

Biographical Sketch
Robert L. Blomeyer, Jr. Ph.D.

Dr. Blomeyer is an educational technology researcher, teacher educator and nationally recognized specialist on online teaching and learning policy and practice. Dr. Blomeyer currently works as a free-lance educational consultant and program evaluation consultant with Blomeyer & Clemente Consulting Services in Lisle, IL.

Dr. Blomeyer previously worked as a Senior Technology Researcher at the North Central Regional Educational Laboratory, now renamed Learning Point Associates. There he managed and contributed to research and development projects and program evaluations examining the integration of technology in education programs, meta-analyses examining “effects” from school and classroom technology use on students’ academic performance, online course development projects, and to new research examining online learning in mid-level and high school programs in public and private schools.

Dr. Blomeyer studied case-study evaluation theory and practice under Professor Robert E. State at the University of Illinois. Since 1985 he has contributed to the development and execution of program evaluations examining various instructional technology programs, schools and in-patient mental health treatment centers.

He was co-editor of *Case Studies on Computer Aided Learning* with G. Dianne Martin (Falmer Press, 1991) and is co-editor with Dr. Catherine Cavanaugh on a new book entitled *What Works in K-12 Online Learning*; forthcoming from ISTE, December 2007.
